POWERING THE FUTURE OF SCHOOL TRANSPORTATION: RNG AS THE PATH TO SUSTAINABLE SCHOOL BUSES WITH THE COWFARTBUS

Join us to discuss how school bus operators can use available AFIG funding to convert existing diesel school buses to the DEMI-NeuFuel School Bus platform (aka the “CowFartBus”) to reduce fuel costs and GHG emissions by displacing a portion of diesel fuel with cleaner, cheaper RNG.

This webinar will describe the PA DEP’s Alternative Fuels Incentive Grant (AFIG) Program and an overview of the DEMI-NeuFuel platform, including:

- Availability of the AFIG grant funding
- Lower fuel costs
- Low-cost of conversion and fueling appliance
- Sustainability benefits of using RNG
