

CLEAN FUELS:

Leading the charge for change

www.pgh-cleancities.org

OUR MISSION:

Pittsburgh Region Clean Cities advances the energy, economic and environmental security of the United States by supporting local actions to reduce petroleum use in transportation. We work locally to advance affordable, domestic transportation fuels, energy efficient mobility systems, and other fuel-saving technologies and practices.

PROJECTS:

Through public-private partnerships, we build and support the infrastructure needed for a strong alternative fuel and alternative vehicle market in Western Pennsylvania. We also serve the needs of member organizations through education, business consulting, development, grant writing, and management of Federal and State-funded projects.

WHAT WE DO:

1. Education

PRCC hosts a variety of educational events throughout the year to help organizations, fleets and consumers learn more about how to adopt alternative fuel vehicles. Join us for webinars, conferences, in-person workshops, and more!!

2. Funding Opportunities

Sign up for our mailing list to learn about grant programs, tax incentives, rebates and other funding opportunities that can help support your transition to clean fuels.

3. Project Guidance

With access to the Department of Energy's Clean Cities Network, PRCC is uniquely situated to provide guidance and technical support on any clean fuel project.

STATISTICS:

2024 Greenhouse Gas Emissions Reduced by Fuel Type for Alternative Fuel Projects
102,902 tons

Historical Gallons of Gasoline Equivalent Reduced

OUR GOALS & INITIATIVES:

Vehicles

Increase the number of alternative-fueled vehicles in the region

Infrastructure

Develop new clean fueling stations and other necessary infrastructure

Corridors

Support the designation of alt-fuel corridors by addressing fueling station gaps

Training

Provide technical training to the public on option and advantages of clean fuels

Technology

Encourage tech transfer and R&D investments in alternative fuels, vehicles and infrastructure

Policy

Educate key decision makers on the need for technology development, deployment and investment
