

## Pittsburgh Region Commercial EV Charging Station Installer Resource List

The installation of commercial electric vehicle (EV) charging stations also requires the installation of “make-ready” electric infrastructure. This infrastructure connects the meter to the charging station, and may include upgrades to the electrical panel as well as the installation of cable and conduit necessary to deliver power to the charging station.

The electrical contractors listed below have indicated an interest in installing EV charging stations and associated “make ready” electrical infrastructure for commercial and public entities in the Pittsburgh region. Please reach out to the companies listed below for consultation on your EV charging station installation project or consult your charging station provider for electrical contractor recommendations. For more information, check out the U.S. Department of Energy’s [Plug-In Electric Vehicle Handbook for Electrical Contractors](#).

**Disclaimer: The inclusion of companies on this list does not imply endorsement or support by Pittsburgh Region Clean Cities. Please note that interested parties are responsible for independently vetting and verifying the capabilities of the listed companies. If your company is interested in being included on the Installer Resource List please email [coordinator@pgh-cleancities.org](mailto:coordinator@pgh-cleancities.org) with company name, contact name, a brief description of your capabilities, phone number, contact email, and website.**
